

World University Rankings 2004

Modified from the Times Higher Education Supplement 2004 World University Rankings

(Entry by Prachayani Praphamontripong and Daniel Levy)

Higher education has become so internationally competitive that competition and the rage for ranking are not limited to individual countries. Whereas rankings had long been associated with the U.S. system, in recent years many countries have seen rankings. Purposes vary, as does reliability or meaning of the data. Still rare, however, have been formal international rankings (though informal yet important invidious international comparison and status perceptions have a very long tradition). Now several organizations attempt to rank universities around the world under some international criteria and have published their results. Such organizations include the Institute of Higher Education at Shanghai Jiao Tong University (China) [<http://ed.sjtu.edu.cn/ranking.htm>] and the Times Higher Education Supplement (UK) [<http://www.thes.co.uk/worldrankings/>]. The Shanghai team has published its annual rankings since 2003 with the top 500 world universities while the THES has started its rankings in 2004 with the top 200 world universities. See *Times Higher Education Supplement 2004 World University Rankings*. The THES comments that the Shanghai list emphasizes such specific criteria as alumni/ staff winning Nobel Prizes, field medals awarded by the International Mathematical Union to an outstanding mathematical achievement, and articles published in particular periodicals mostly science-oriented such as Nature and Science. In contrast, the THES team claims that it rates institutions based on more neutral criteria such as international citations in a wider range of publications and staffing levels at the time an institution was evaluated regardless of specific prizes or awards received in a previous time. The THES team further claims that its measures are designed to be as objective and internationally unbiased as possible.

To provide useful information on private higher education for scholars and policymakers, PROPHE culls from the THES data and reformulates in a few ways. In addition to reproducing the full THES data, PROPHE shows the shares of public vs. private institutions, thus helping our ability to assess inter-sectoral distinctiveness. In this file, PROPHE, therefore, presents data in 4 formats going beyond the total listing: 1) private higher education institutions outside the US; 2) total data sorted by country, in alphabetical order; 3) total data sorted by region, in alphabetical order; and 4) data for total non-US, in alphabetical order by region. Particularly, ***the number in front of each institution's name signifies its rank in the THES rankings.***

The criteria of THES 2004 ranking are listed as follows. Firstly, weighted at half of the total score, ***peer review*** was produced by QS (a worldwide London-based company) in the survey of 1,300 institutions in 88 countries. Secondly, ***citations per faculty member*** as a research impact are accounted for 20 per cent of the score. Such data stem from Thomson Scientific's Essential Science Indicators database. Thirdly, ***faculty-to-student ratio*** is weighted at a further 20 per cent of the score and collected by QS in order to capture an institution's commitment to teaching. Lastly, the rest 10 per cent is divided equally to measure an institution's percentage of ***international faculty*** and ***overseas students***. Data are from the QS' top 300 institutions discovered in the peer review process coping with information from individual academics, national agencies, and accepted international references (For more information, see *Times Higher Education Supplement World University Rankings 2004* at http://www.geos.ed.ac.uk/postgraduate/THES_rankings04.pdf)

In addition, PROPHE presents other useful information alongside the ranking tables, such as an institution's status, history, and selected points from the *International Handbook of Universities*, 18th ed., by International Association of Universities, as well as from website of individual institutions.

I. Private Universities Outside the US:

*Modified from the Times Higher Education Supplement 2004 World University Rankings
(by Region)*

The number in front of each institution's name signifies its rank in Times Higher Education Supplement 2004 World University Rankings.

Number	Name*	Region**	Country*	Status**	History**	Peer review*	International faculty*	International student*	Faculty/Students*	Citations/Faculty*	Final score*	Link**
1	163 Pohang University of Sci & Technology (POSTECH)	Asia	South Korea	Private	Founded in 1986 by two businessmen with a stated goal of building a world-class research university.	22	14	18	8	56	120.9	http://www.postech.ac.kr/new/e/index.php
2	052 Université Catholique de Louvain	Europe	Belgium	Private	Founded 1425. Independent of direct State control but receives a full State subvention.	104	26	41	17	19	212.6	http://www.ucl.ac.be
3	054 Free University of Brussels	Europe	Belgium	Private	A private autonomous institution receiving substantial financial support from the State. It was established with the idea of independency from the state and the church.	54	41	57	10	36	205.1	http://www.vub.ac.be http://www.ulb.ac.be
4	191 Nijmegen University	Europe	Netherlands	Private	A private Catholic university receiving public funding	22	20	12	33	17	107.1	N/A
5	110 Chalmers University of Technology	Europe	Sweden	Private	Founded 1829. A foundation university, rooted from an industrial and commerce sector.	71	17	22	11	25	150.2	http://www.chalmers.se
6	147= McMaster University	US&Canada	Canada	Private	Founded 1887 and initiated by Baptists in central Canada. A non-denominational private foundation	28	24	13	11	47	127.3	http://www.mcmaster.ca

*“The five indicators [Peer review, international faculty, international student, faculty/students, and citations/faculty] have been chosen [by the Times Higher Education Supplement] to reflect strength in teaching, research and international reputation, with the greatest influence exerted by those in the best position to judge: the academics. University staff from every continent have given their verdict on the top institutions in their field, rather than delivering a more impressionistic judgment of quality across the board,” (the Times Higher Education Supplement, 2004, p. 2).

** International Association of Universities, 2005. International Handbook of Universities, 18th ed, New York, NY: Palgrave Macmillan.

Note: Given PROPHE's findings about the rarity of elite private universities outside the U.S., It is not so surprising that there are only six non-US private universities, with none (unless one counts South Korea) from the developing world, where PHE/total higher education enrollment percentages are often very high (for more detail, see PROPHE Country Data Summary at <http://www.albany.edu/dept/eaps/prophe/data/PROPHEDataSummaryJan06.doc>). Moreover, at least three of the six are basically government funded and therefore quite ambiguous in private-public status. But the data here do provide stark and extreme evidence on the lack of private research universities outside the U.S. They also reaffirm that private growth comes prominently from forces of religious foundation and the business sector (see PROPHE Working Paper #1 on private growth at <http://www.albany.edu/dept/eaps/prophe/publication/Unanticipated.htm>). On a more marginal point, the findings show that while the criteria of peer review and citations lend support for English-speaking institutions in US and European countries as they score high in such elements, POSTECH University from South Korea outperforms the other five in terms of faculty-to-student ratio. POSTECH also has the highest percentage of citations per faculty member as it is a science and technological oriented institution where research publications are of the most important academic result.

II. World University Rankings 2004

The table's data are reproduced from the THES presentation, except that we show by COUNTRY.

The number in front of each institution's name signifies its rank in Times Higher Education Supplement 2004 World University Rankings.

Number	Name	Country	Peer Review	Int'l Faculty	Int'l Students	Faculty/ Students	Citations/ Faculty	Final score

"The five indicators [Peer review, international faculty, international student, faculty/students, and citations/faculty] have been chosen [by the Times Higher Education Supplement] to reflect strength in teaching, research and international reputation, with the greatest influence exerted by those in the best position to judge: the academics. University staff from every continent have given their verdict on the top institutions in their field, rather than delivering a more impressionistic judgment of quality across the board," (the Times Higher Education Supplement, 2004, p. 2).

II. World University Rankings 2004

The table's data are reproduced from the THES presentation, except that we show by COUNTRY.

The number in front of each institution's name signifies its rank in Times Higher Education Supplement 2004 World University Rankings.

Number	Name	Country	Peer Review	Int'l Faculty	Int'l Students	Faculty/ Students	Citations/ Faculty	Final score

"The five indicators [Peer review, international faculty, international student, faculty/students, and citations/faculty] have been chosen [by the Times Higher Education Supplement] to reflect strength in teaching, research and international reputation, with the greatest influence exerted by those in the best position to judge: the academics. University staff from every continent have given their verdict on the top institutions in their field, rather than delivering a more impressionistic judgment of quality across the board," (the Times Higher Education Supplement, 2004, p. 2).

III. World University Rankings 2004

The table's data are reproduced from the THES presentation, except that we show by REGION.

The number in front of each institution's name signifies its rank in Times Higher Education Supplement 2004 World University Rankings.

Number	Name	Region	Country	Peer Review	Int'l Faculty	Int'l Students	Faculty/Students	Citations/Faculty	Final score

77	087 The University of Dublin, Trinity College (TCD)	Europe	Ireland	Public	Founded 1592 by Royal Charter. Financed by the Dept. of Education and Science.	57	45	29	8	24	167	http://www.tcd.ie

*"The five indicators [Peer review, international faculty, international student, faculty/students, and citations/faculty] have been chosen [by the Times Higher Education Supplement] to reflect strength in teaching, research and international reputation, with the greatest influence exerted by those in the best position to judge: the academics. University staff from every continent have given their verdict on the top institutions in their field, rather than delivering a more impressionistic judgment of quality across the board," (the Times Higher Education Supplement, 2004, p. 2).
